---

## PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with over 5 years of experience architecting and scaling enterprise backend systems, web applications, and cross-platform tools. Proven technical leadership, directing engineering roadmaps and managing end-to-end software lifecycles. Specializes in building robust, high-throughput APIs with .NET/C# and reactive, performance-optimized frontends with React, Next.js, and TypeScript.

---

## EXPERIENCE

**Imel d.o.o. Lukavac** | Lukavac, Bosnia and Herzegovina

*Full Stack Software Engineer* | July 2026 – Present

- Designed and developed an AI-powered conversational automation chat interface for core ERP software, enabling users to execute complex system workflows and database queries using plain natural language.
- Design and implement secure RESTful APIs and optimized database queries, reducing data-fetch latency across core business operations.
- Standardize deployment workflows and maintain high-availability server infrastructure to guarantee near-zero downtime and business continuity.

**AVL List** | Graz, Austria

*Full Stack Software Engineer (Lead Developer from March 2025)* | June 2022 – June 2026

- Engineered and maintained mission-critical full-stack web and desktop solutions utilizing .NET/C#, ensuring stable functionality across UI, business logic, and data tiers.
- Promoted to Lead Developer in mid-2025; directed cross-functional project architecture, planned sprint milestones, and mentored junior engineers to accelerate feature delivery.
- Automated cross-team deployment pipelines and integrated internal telemetry tools, reducing manual operational handoffs.
- Optimized DevOps and CI/CD release cycles, increasing deployment consistency and cutting manual intervention overhead.
- Executed comprehensive QA protocols, automated performance testing for internal APIs, and provided tier-1 technical support to rapidly triage and resolve production bottlenecks.

**Freelance** | Graz, Austria (Remote)

*Full Stack Software Engineer* | June 2019 – June 2022

- Designed and deployed responsive business websites, web portals, and SPAs utilizing React, TypeScript, HTML5, and SCSS, optimizing load times and cross-browser performance.
- Delivered customized WordPress platforms featuring bespoke themes, custom plugins, and integrated third-party RESTful web services.
- Developed scalable backend Node.js/Express APIs and managed end-to-end cloud deployments across cPanel and Hostinger production environments.

**BILD IT** | Tuzla, Bosnia and Herzegovina

*Full Stack Software Engineer* | September 2018 – June 2019

- Spearheaded the architecture and development of an enterprise CRM platform featuring real-time client management and automated reporting, supporting over 200 active client accounts.
- Built secure, horizontally scalable RESTful microservices and APIs using the Java stack (Java, Spring Boot, MySQL), optimizing high-volume database queries.
- Facilitated architecture workshops, led structured code reviews, and mentored junior developers as a teaching assistant in an intensive coding bootcamp.

---

## EDUCATION

**Technical University of Graz** | Graz, Austria

*BSc in Information and Computer Engineering*

---

## TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript, Java, Python, C, C++, HTML5, CSS/SCSS
- **Frontend & Mobile:** React, Next.js, Redux, React Native, Electron, Tauri, Tailwind CSS, TanStack Query, .NET MAUI
- **Backend & APIs:** .NET 8/10, ASP.NET Core, .NET Framework, Node.js, Express, REST APIs, gRPC, WebSockets, Webhooks
- **Databases & Cloud:** MSSQL, PostgreSQL (with pgvector), MySQL, MongoDB, Firebase, Supabase, Azure, Linux, Self-Hosting
- **DevOps & Management:** Git, GitHub, GitLab, CI/CD Pipelines, Docker, Jira, Confluence, ClickUp, Plane
